DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

Allowable Subject Matter

2. Claims 63-71 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to anticipate or make obvious a control device to cause a storage device to supply power to a heat source when a sensor member senses a temperature of the fixing member has decreased below a first reference temperature from a start of an image forming operation, wherein the controller changes the first reference temperature based on a rate of decrease of the temperature of the fixing member as regard to claim 63; a control device to cause the storage device to start to supply power to the heat source when a temperature of the fixing member has decreased to a second reference temperature TA higher than a first reference temperature TB within a predetermined period of time (t) from a start of image formation; and, in a case when the temperature of the fixing member has not decreased to the second reference temperature TA within

the predetermined period of time (t) from the start of image formation, the control device causes the storage device to start power supply to the heat source when the temperature of the fixing member has decreased to the first reference temperature TB as regard to claim 70; a control device to control a power supply amount from the storage device to the heat source, wherein the control device causes the storage device to start to supply power to the heat source when a temperature of the fixing member has decreased to a second reference temperature TA higher than a first reference temperature TB by the time a predetermined number of sheets has been fixed from a start of image formation; and, in a case when the temperature of the fixing member 1 has not decreased to the second reference temperature TA by the time the predetermined number of sheets has been fixed from the start of image formation, the control device causes the storage device to start to supply power to the heat source when the temperature of the fixing member has decreased to the first reference temperature TB as regard to claim 71.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
